

Products: [MP Rotator](#) [1]

Topics: FAQs

You cannot shutoff the spray on the MP Rotator nozzle using the radius adjustment screw. To shut off spray to one head within a zone you would need to cap off the head at a PVC level or install a **Pro Spray Shutoff Cap** (if a **Pro Spray** head is installed). The Pro Spray shutoff cap can be purchased through your local hunter distributor, click on Get Hunter at the top of this page to locate a distributor near you.
