

Products: [Solar Sync™](#) [1]

Topics: Adjustment, FAQs, Video

One station:

At any time you can simply increase or decrease **Run Time** to any individual station in the host controller and that station will adjust up and down with all the rest of the stations from a new level.

All stations:

Use the water + and - feature on the Solar Sync module to adjust the percentages applied to the controller. The Solar Sync comes from the factory set at 5 and can be adjusted from 1-10 with 10 giving you a higher percentage and 1 giving a lower percentage adjustment.
