Node ^[1]

This feature permits the user to stop all programmed watering for the designated period from 1-99 days. At the end of the programmable off period the controller will resume normal operation.

1. From the Idle Mode, press the  button until the  icon is displayed. Wait two seconds until **OFF** is shown on the display. The controller is now in **System Off** mode.
2. Press the **plus (+)** button and a 1 will be displayed blinking, indicating the number of days the controller will stay off. Program the off days as desired, up to 99 days maximum.
3. The display will show the number of days remaining in the **OFF** period.
4. To interrupt the OFF period press the  button to return to the Idle Mode screen, which shows the time of day, day of the week, and battery life.
