SOLAR SYNC WEATHER SENSOR

Truly “Smart” Irrigation Control is Now Available for All

The Solar Sync Sensor is an advanced weather sensor that calculates evapotranspiration (ET) and adjusts Hunter controllers daily based on onsite weather conditions. Solar Sync measures sunlight and temperature, and uses ET to determine the correct seasonal adjustment percentage value to send to the controller. The controller then uses its programmed run time and adjusts to Solar Sync’s seasonal adjustment value to modify the actual irrigation run time for that day. In addition, the Solar Sync sensor integrates Hunter’s popular Rain-Click™ and Freeze-Clik® sensors providing quick response in shutting down your irrigation system during rain and/or freezing conditions. The Solar Sync is compatible with most Hunter controllers and applicable to residences, businesses, and municipalities alike.

SOLAR SYNC FEATURES & SPECIFICATIONS

Features

- Provides automated daily adjustment to program run times
- Wired and wireless models available
- No Water Window programming available in most controllers
- Rain and freeze shutoff
- Gutter mount bracket included
- Warranty period: 5 years (10 year battery warranty for wireless model) electrical
- Rain and Freeze sensor shutdown capability included in sensor

Specifications

- Maximum distance sensor to module: 60 m (wired model) or 240 m (wireless model)
- 12 m of wire included in kit (wired model)
- Solar Sync and Wireless Solar Sync compatible with Pro-C and PCC controllers
- Solar Sync SEN and Wireless Solar Sync SEN are compatible with X-Core, I-Core, and ACC controllers

Model

- Smart, weather-based controls are available in every Hunter AC powered controller category.

SOLAR SYNC SENSOR
(w/ mounting arm)
7.6 cm H x 22 cm W x 2.5 cm D

SOLAR SYNC MODULE
4.4 cm H x 13 cm W x 1.9 cm D

WIRELESS SOLAR SYNC SENSOR
(w/ mounting arm)
11 cm H x 22 cm W x 2.5 cm D

WIRELESS SOLAR SYNC RECEIVER
14 cm H x 3.9 cm W x 3.8 cm D

SOLAR SYNC MODEL CHART
