MINI-CLIK®

FEATURES
• Easily installs on any automatic irrigation system
• Debris tolerant for reliable operation without unnecessary shutdowns
• Can be set to shut system off from ¼" to ¾" of rainfall
• Includes 25' of 20 AWG sheathed, two-conductor, UL-approved wire
• Optional user-installed metal gutter mount for Mini-Clk (order SGM)
• Optional user-installed stainless steel sensor guard enclosure for Mini-Clk (order SG-MC, includes Mini-Clk)
• Warranty period: 5 years

SPECIFICATIONS
• Switch rating: 24 VAC, 5 A
• Wiring: 20 AWG, UL listed, typically interrupts the common ground wire between the solenoid valves and controller

FREEZE-CLIK®

FEATURES
• Installs easily with no adjustment needed
• Accurate temperature sensing shuts system off when air temperature reaches 37°F
• Used with other sensors to enhance overall efficiency of irrigation systems
• Warranty period: 5 years

Note: Not intended for agricultural applications

SPECIFICATIONS
• Switch rating: 24 VAC, 5 A
• Wiring: Typically interrupts the common ground wire between the solenoid valves and the controller
• UL listed
