

# NODE-BT

Simple by design, reliable by reputation:  
Meet the best battery-operated  
Bluetooth controller in the industry

## KEY BENEFITS

### NODE-BT App

Controller schedule and sensor settings are managed via the NODE-BT app and serve as a remote control for an unlimited number of devices.

### Manual Operation

NODE-BT's simple interface acts as a diagnostic tool for quicker troubleshooting.

#### Know Station Status

Active station LED indicators

#### Quick Manual Start

Start and stop stations without dirtying your smartphone

#### Quick Battery Check Button

LED turns red or flashes green to indicate battery health at a glance

### Controller Design

NODE-BT is available in 1-, 2-, and 4-station models.

#### Rain or Klik Sensor Ready

Connect a Mini-Klik™ or Rain-Klik™ sensor for more water savings

#### Soil Moisture Sensor Ready

Attach SC-Probe for instant moisture detection and irrigation suspension

#### Wiring Distance

DC solenoid wires extend up to 30 m; Station 1 on multi-station models offer optional P/MV

#### Double O-Ring Seal

IP68 waterproof, submersible up to 3.5 m

#### Redesigned Drop-in Battery Compartment

No more finicky wire snaps

### Redesigned Seal

Durable cap and ring are quick to remove and prevent corrosion and water intrusion.

## IN THE FIELD

- Challenge:** Battery-operated controllers require locating the valve box, reaching inside a dirty opening, and programming the controller using a dark screen and buttons.

**Solution:** Avoid the valve box with the NODE-BT app, allowing full programming from up to 15 m away. You can also save each controller's location.
- Challenge:** Battery-operated controllers require periodic battery replacement, leaving plants to suffer if maintenance is missed.

**Solution:** Only the NODE-BT accepts up to two 9V batteries, extending the time between service intervals.

## IN THE DESIGN OFFICE

- Pre-program the controller schedule and password protect the unit before installation to reduce site changes.
- Quickly verify operation with the Event Logger, which details the previous 100 controller events. Share this information as needed with the site owner or maintenance crew.

Speed up controller programming with pre-saved schedules that are transferable to any NODE-BT controller in seconds.

## BLUETOOTH BATTERY-OPERATED CONTROLLER COMPARISON

FEATURES		NODE-BT	Competitor 1	Competitor 2
MOBILE APP	Bluetooth performance and range	████████████████████	██████████████████	██████████████████
	View system status, total watering time, and next start time	●		
	App shows the last battery-change date and sends reminders	●		
	Ability to upload zone images, rename stations, programs, and controllers	●		
	Review up to 100 irrigation events	●		
IRRIGATION	Run times from 1 second to 12 hours	●		
	0-300% monthly seasonal adjust	●	●	●
	Cycle and soak to prevent runoff	●		
	Soil moisture sensor capable	●		
CONTROLLER	Physical start/stop buttons on the controller	●		
	Battery indicator on the controller	●		
	Rugged cap with double O-ring seal	●
