PILOT® CCS
Take Command of Golf Course Irrigation

GOLF IRRIGATION | Built on Innovation®

hunterindustries.com/golf
VISUALIZE
Your Entire Course

With next-generation Pilot Command Center software (CCS), you can create hydraulically safe and efficient daily golf course watering plans faster than ever before. Pilot helps manage thousands of individually controlled sprinklers in seconds — right from the Command Center. From here, you can make all watering changes from one easy-to-navigate screen.

This is the fastest way to enable nightly irrigation updates for the entire golf course. Using the Command Center, simply update your watering plan according to the day’s requirements. Then decide what time you want to start watering — Pilot takes care of the rest!

1. Use the watering plan to manage your course with minutes, depth, or local ET data

Pilot gives you a variety of choices so course irrigation can fit your preferred management style. Choose between minutes, depth, and evapotranspiration data to encourage more efficient application and use of water.

2. Apply global course watering requirements with a few simple clicks of the mouse

Enhance your user experience with daily course adjustment capabilities built directly into the Command Center. From flushing needs to wet areas and hotspots, you can easily create specialized watering schedules for niche applications.

3. Quickly gain a complete view of your watering plan with color-coded groups

Pilot is the only irrigation management tool in the industry to offer color-coding to simplify management. Colors provide a simple automatic reminder that you’ve made adjustments to specific areas and help with problem resolution.

4. Customize your watering plan according to specific daily needs

Improve your understanding of your course by adding an interactive map. Although having a map is not required, adding one allows you to run water by clicking the station symbols on the map. You can also monitor stations as they are running.
DAILY ADJUSTMENTS
Are Just a Few Clicks Away

Command Center Management Groups

The Command Center displays all your stations grouped in color-coded columns according to your management preference. Quickly select a watering group to make simple daily adjustments. Create, name, and add notes to custom groups to better manage day-to-day watering requirements, such as hot spots or wet areas that need to be dried out. The ability to see these adjustments on a course-wide scale reminds you what was changed and why.

Lenovo® and ThinkVision® are trademarks of Lenovo in the United States, other countries, or both.
Using the convenient watering palette, you can make daily adjustments in seconds. Decide what time to start watering — Pilot takes it from there.

The watering palette is a customizable control panel for your watering plan.

Since graph colors correspond to your watering plan, you can better prioritize course needs.

Since graph colors correspond to your watering plan, you can better prioritize course needs.

ADDRESS DAILY COURSE NEEDS

SEE YOUR PLAN IN ACTION

Pilot transforms your watering plan into a comprehensive flow graph that presents you with critical information — so you can irrigate with confidence.

DEVELOPED WITH
You in Mind

Thanks to Pilot, day-to-day irrigation management tasks are easier than ever before. Pilot is packed with powerful tools that provide a simpler way to manage irrigation on a golf course while minimizing labor and maximizing cost savings over time. Thanks to built-in redundancy, Pilot also provides peace of mind. Should the central computer ever go down, course irrigation will continue as usual because watering instructions are stored in the field equipment.

At Hunter Golf, we strive to create the best products in the industry. We’re here to help make your job easier, and we encourage you to send us feedback anytime so we can continue improving our software. We value your comments!
Gene Smith, President, Landscape Irrigation and Outdoor Lighting

Helping our customers succeed is what drives us. While our passion for innovation and engineering is built into everything we do, it is our commitment to exceptional support that we hope will keep you in the Hunter family of customers for years to come.

Hunter has been on the leading edge of golf course irrigation for more than three decades. We build performance, reliability, and serviceability into every product. From our industry-best rotors to our robust Pilot® irrigation control system, we take pride in providing golf experts and professionals with the tools and support they need to conceptualize, create, and manage world-class golf courses.
