By installing efficient irrigation products in your landscape, you are ensuring healthy growth and minimal water use.

Benefits of Installing an Automatic Irrigation System

Recent conservation-focused innovations have opened the door for landscapes to flourish while using far less water than past solutions.

Not only do these new components benefit your local environment and landscape, they also save you significant money on your water bill.

Installing an Automatic Irrigation System:

- Protects your investment in landscaping
- Increases your property value
- Eliminates the hassles of hand watering
- Incorporates watering schedules
- Maximizes water efficiency

Hiring a Professional Ensures Quality

By hiring a professional, you are guaranteed proper installation of the best products and maintenance of a functional system.

- Your local professional knows the correct installation for a successful system
- They guarantee their work with services and warranties
- Contractors understand the landscape's needs and follow local ordinances
- They're experts in proper system layout, and plant and soil needs
- Periodic inspections allow suggested repairs and product updates
- The professional's skills ensure years of trouble-free performance

Hunter Water Saving Products Maximize Water Efficiency

MP Rotators apply water slowly, allowing water to be absorbed deep into the soil, reducing wasteful runoff

Micro irrigation products distribute water right to the root of the plant

Controllers are the brain of the system and when properly programmed ensure a landscape receives the right amount of water at the optimal watering time

Solar Sync weather sensors save water by adjusting your run times based on local weather.

When paired with Solar Sync, all AC powered Hunter controllers are EPA WaterSense® labeled

Rotors effectively irrigate large areas with uniform coverage and can apply water at lower rates, preventing over-watering

Valves are engineered to withstand the rigors of day-to-day use, ensuring the reliable operation of your system
