

The Professional's First Choice

As a trusted partner of contractors worldwide since 1981, we are proud to offer the most water-efficient irrigation solutions on the market. From next-generation smart controllers to comprehensive micro irrigation systems, all Hunter products are engineered to ensure healthy, sustainable landscapes in every application. Combined with our exceptional customer service and leading warranties, your satisfaction is guaranteed.

A Leader in Corporate Social Responsibility

At Hunter Industries, saving water and energy is part of who we are. Our efforts to protect the environment and conserve natural resources extend far beyond our product lines to every aspect of our business, from facilities management to manufacturing processes.

Protect Your Outdoor Living Space

No matter where you live or what type of landscape you have, watering wisely is a win-win for your wallet and the environment. When you hire professional contractor to design, install, and maintain your Hunter automatic irrigation system, you protect your property with best-in-class technology and years of trouble-free operation. Schedule an appointment with your local contractor and ask about Hunter irrigation solutions today.

SYSTEM EFFICIENCY CHECKLIST

Overall	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Inspect system for leaks, damage, and missing components	<input type="checkbox"/>	<input type="checkbox"/>
Spray Heads and Rotors		
Are in good working condition	<input type="checkbox"/>	<input type="checkbox"/>
Are correctly installed and level	<input type="checkbox"/>	<input type="checkbox"/>
Properly adjusted and not spraying on unintended areas	<input type="checkbox"/>	<input type="checkbox"/>
Nozzle sizes and head spacing provide even coverage	<input type="checkbox"/>	<input type="checkbox"/>
Measured spray pressure: Actual: ____ PSI Optimal: ____ PSI	<input type="checkbox"/>	<input type="checkbox"/>
Measured rotor pressure: Actual: ____ PSI Optimal: ____ PSI	<input type="checkbox"/>	<input type="checkbox"/>
Check valves hold water in system while not in use	<input type="checkbox"/>	<input type="checkbox"/>
Micro Irrigation		
Confirm proper regulation below 50 PSI	<input type="checkbox"/>	<input type="checkbox"/>
Confirm zone filtration at 150 mesh	<input type="checkbox"/>	<input type="checkbox"/>
Group plants with similar watering needs	<input type="checkbox"/>	<input type="checkbox"/>
No unusually dry or wet areas	<input type="checkbox"/>	<input type="checkbox"/>
Irrigation Controller		
Controller programmed to comply with local ordinances	<input type="checkbox"/>	<input type="checkbox"/>
Controller operating correctly for all landscape areas (conduct a manual test)	<input type="checkbox"/>	<input type="checkbox"/>
Controller adjusted to seasonal demands	<input type="checkbox"/>	<input type="checkbox"/>
Appropriate weather sensor(s) installed	<input type="checkbox"/>	<input type="checkbox"/>
Flow sensor installed	<input type="checkbox"/>	<input type="checkbox"/>

EPA WaterSense Approved Products

Hunter offers controllers, sensors, and sprays that are recognized as responsible water-saving tools by the U.S. Environmental Protection Agency.

Experience the Benefits of Smart Watering

By installing a Hunter automatic irrigation system in your landscape, you ensure healthy plants while saving water.

From pressure regulation to irrigation scheduling, many states and municipalities mandate that irrigation systems include strict requirements to save water. Hunter's dedication to innovative irrigation technology ensures compliance and allows landscapes to flourish in any environment.

Choose a Hunter automatic irrigation system to:

- Protect your investment in your outdoor living space
- Increase the value of your property
- Eliminate the hassles of hand watering
- Incorporate convenient watering schedules
- Minimize your environmental footprint
- Lower your water bill by up to 50%

Hunter Solutions Maximize Water Efficiency

We offer a range of industry-leading, water-saving products that may be exempt from watering restrictions. Check with your local water agency to learn more.

MP Rotator® nozzles apply water slowly, allowing water to be absorbed deep into the soil without wasteful runoff.

Micro irrigation products like HDL distribute water slowly and precisely at the base of the plant to achieve maximum water savings.

Weather sensors adjust irrigation according to on-site conditions. AC-powered Hunter controllers are EPA WaterSense certified with a Solar Sync® sensor or when using internet weather data.

Hydrawise® smart Wi-Fi controllers provide the exact amount of water for landscapes to thrive, with automatic adjustments based on local weather. Plus, you can manage Hydrowise from anywhere!

Rotors effectively irrigate large areas with uniform coverage and apply water at lower rates to prevent over-watering.

Valves are engineered to withstand the rigors of harsh environments and ensure a highly reliable system in every application.
