

THE BENEFITS of PRESSURE REGULATION

PRS30
and
PRS40

The Hunter Pro-Spray® PRS30 and PRS40 are pressure regulation devices that maximize the efficiency of an irrigation system by ensuring that each Spray nozzle or MP Rotator sees optimal pressure. Proper pressure regulation results in significant water savings by reducing flow, reducing misting, and improving the distribution uniformity.

YEARLY WATER SAVINGS of over **30%**

WATER SAVINGS POTENTIAL:

A 30 PSI with PRS30 **B** 50 PSI unregulated 1 Zone + 10 Heads with 15' Nozzles + 10 Minutes
