BTT BLUETOOTH TAP TIMER®

Automatically irrigate gardens, plants, and flowers from a hose faucet

BTT provides efficient light irrigation to even the smallest landscapes. BTT is easy to operate and simple to set up, and is designed for use with a hose faucet. It gives users convenient options to remotely program irrigation from their smartphone, and avoid climbing around shrubs or stepping on delicate plants to operate. BTT includes long-lasting batteries, and uses a mobile iOS® or Android™ app with two irrigation modes and two start times each to program watering schedules. The built-in, push-button manual start allows up to one hour of manual irrigation with automatic shutoff, without the need for a smartphone.

BTT makes simple irrigation quick and affordable, and is the perfect add-on item for contractors to offer additional service and easy maintenance.
